

TESI 661

Indiana Line – a valued Italian audio brand

Indiana Line is one of the most important Italian brands in the audio industry, and its traditions date back to 1977. The brand's philosophy is to provide products of the highest possible quality with the use of carefully selected components, allowing for a customer-friendly value for money. This makes the sound qualities of the Indiana

Line loudspeakers go far beyond the nominal parameters.

Perfect for each interior arrangement

The classic and modern rounded edges of the Tesi series loudspeakers are the essence of Italian style. The loudspeakers have been finished with a durable and aesthetic vinyl. Two colour variants are available – light walnut and black oak, which will match perfectly to interiors with virtually any arrangement. Indiana Line Tesi surprises not only with its design, but also with its mature sound, unrivalled in its price. The amplifier loading impedance between 4 – 8 ohms guarantees good efficiency and at the same time is not a problem in terms of operating with currently produced amplifiers or receivers.

Solid floorstanding model with bass reflex port in the base

The Indiana Line Tesi 661 is a solidly constructed 3-way floorstanding speaker with a 26 mm dome tweeter, a 160 mm mid-woofer and a pair of 160 mm high dynamic woofers. The massive cabinet with two internal reinforcements rests

on four aluminum feet equipped with anti-vibration rubber pads. The bass reflex port is in the base. The speaker is intended mainly for larger, but also for semi-open interiors of 16 to 25 m². Because of its dimensions and the type of the cabinet, the loudspeaker will sound best when placed about 1 meter from the wall. The dedicated amplifier power to drive the Tesi 661 model is 30 –160 W.

Solutions ensuring great sound

The Tesi 661 model uses a mid-woofer made of a mixture of polypropylene and mica. In combination with the phase plug, it allows for an exceptionally detailed and faithful sound of the midrange. The woofer, on the other hand, has been made of cellulose pulp, which guarantees warm and strong bass reproduction. Tesi 661 uses a silk dome tweeter with a neodymium magnet and a radial rear chamber. It is located in a specially cut and profiled front, relatively close to the mid-woofer. This offers open and clear treble. The uniqueness of the structure is emphasized by the sole use of air coils and foil capacitors in the tweeter filter.

The most important features of the Tesi 661 model:

- 3-way acoustical design
- Crossover frequencies: 400 Hz and 3 kHz
- 2 x 160 mm woofer
- 160 mm mid-woofer
- 26 mm silk dome tweeter
- Bass reflex cabinet with a port in the base
- Frequency response: 35 Hz to 22 kHz
- Bi-amping / bi-wiring capability
- Finish: black oak or light walnut
- Suggested amplifier power: 30 - 160 W
- Sensitivity: 92 dB (2,8 V / 1 m)
- Dimensions (H x W x D): 925 x 180 x 300 mm
- Weight: 14,1 kg
